Maher Faisal Rafin

has successfully completed the online Professional Certificate

Information Security Analyst

The Information Security Analyst program is designed to provide you with a comprehensive understanding of the essential skills required for a successful career in cybersecurity. This program focuses on different aspects of information security, ethical hacking, network defense, digital forensics, and security operations. By completing this program, you have gained in-depth knowledge and hands-on experience, and you are prepared to protect organizations from cyber threats, respond to security incidents, and ensure the integrity and confidentiality of sensitive information.
