Introduction to Computer Security

Introduction to Network Security

Security Management and Governance

Cybercrime

May 2, 2026

Maher Faisal Rafin

has successfully completed the online Specialization

Cyber Security – Technology and Governance

In this specialisation learners covered topics ranging from the security of computer system and networks, that are the key elements in cyber security, to the key role of human aspects in cybercrime. They studied fundamental concepts of how computers work, computer system core components and then extended this to consider a variety of topics from hardware to applications. Learners were presented with some of the key components of practical cyber security management and its governance. This included what happens when things go wrong, understanding how organisations can respond to incidents, through to the essential role of people in achieving better cyber security outcomes.
